 Grab for unhygienic waste - comprises metal frame with jaws  
 spring-loaded apart accommodating environmentally friendly sack  
 SIEVAL J 26.09.88-NL-002356  
 (17.04.90) E01h-01/12

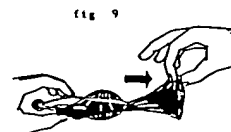

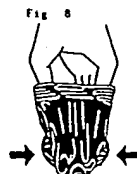

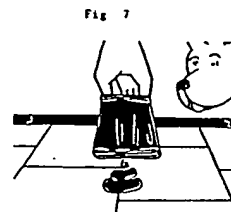

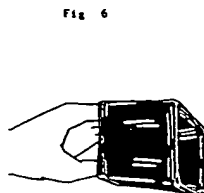

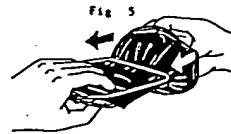

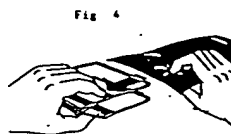

26.09.88 as 002356 (160)

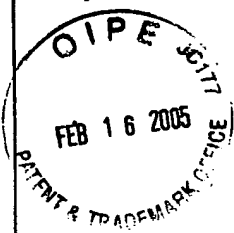

The grab is for small amounts of unhygienic waste, where contact with the hand must be avoided.

It comprises a metal frame with jaws held apart by a spring, while a loop fitting over the spring locks them shut. An environmentally-friendly sack fits over the jaws, having dimensions and strength such as to keep the frame and hands free of contamination.

USE - For removal of animal dung, waste food etc. (7pp Dwg.No. 4-9)

N90-112430
